EDUCATION

Birla Institute of Technology and Science (BITS), Pilani

2016 – 2020

B.E. in Computer Science, GPA: 9.23/10

Pilani, India

Relevant Courses: Neural Networks and Fuzzy Logic, Information Retrieval, Data Mining, Linear Algebra, Calculus, Probability and Statistics, Object Oriented Programming, Data Structures, Algorithms, Database Systems, Computer Programming, Linguistics

EXPERIENCE

Avaamo

June 2021 – Present

Neural Voice Cloning and Tabular Question Answering

Bangalore, India

- Worked on **neural voice cloning** and synthesis with **limited** user speech **data**.
- Working on **semantic parsing** and **question answering** over tabular data.

Multimodal Digital Media Analysis Lab (MIDAS), IIIT Delhi

Dec 2020 – Present

Online Text Stream Modeling and Interpolative Data Augmentation

Delhi, India

- Worked on **time-aware** modeling of online text streams leveraging the **hyperbolic space** for financial analysis.
- Ramit Sawhney*, Shivam Agarwal*, Megh Thakkar*, Arnav Wadhwa, Rajiv Ratn Shah: Hyperbolic Online Time Stream Modeling. In Proceedings of the 44th International ACM SIGIR Conference on Research and Development in Information Retrieval, Jul 2021.
- Worked on cross-modal model agnostic **interpolative data augmentation**.
- Ramit Sawhney*, Megh Thakkar*, Shivam Agarwal, Di Jin, Diyi Yang, Lucie Flek. HypMix: Hyperbolic Interpolative Data Augmentation. In Proceedings of the Conference on Empirical Methods in Natural Language Processing (**EMNLP**), Nov 2021.

NTU-NLP, Nanyang Technological University

Aug 2020 – Present

Open Domain Question Answering by Jointly Using Text and Knowledge Base and Chart-based Text Generation

Singapore, Singapore

- Worked on improving **retriever-reader models** for **open domain question answering** for the Natural Questions dataset by constructing **networkx graphs** from retrieved documents using identified entities and enhancing the text representation using **graph convolutional networks**.
- Working on **chart summarization** and **question answering** using graph-to-text, data-to-text and image-to-text approaches.

Speech and Language Processing Group, Nanyang Technological University

Aug 2019 – Dec 2019

Speech Emotion Detection and API Gateway

Singapore, Singapore

- Created an **API Gateway** to access various existing deep learning modules such as NER (Name-Entity Recognition), SUD (Sentence Unit Detection), and summarization through a standard interface.
- Built a **resource efficient** production-level **CNN-based model** for speech based emotion detection.

Language Technology Group, University of Hamburg

May 2019 – July 2019

Language Model for Query Auto-completion

Hamburg, Germany

- Developed a bi-LSTM based hybrid **character level language model** infused with word embeddings, such as GloVe, ELMo, and Flair, as well as a combination of FastText and sent2vec.

RELEVANT PROJECTS

VQA Models that Read Text

Jan 2020 – May 2020

- Conducted literature review and studied various methods of **multimodal deep learning**, **multimodal attention** and its applications in downstream tasks such as **TextVQA** and **Visual Commonsense Reasoning**.
- Identified approaches to enhance the baseline model by improving the **OCR module**.

Visual Question Answering

Aug 2018 – Dec 2018

- Implemented a basic **visual question answering** system for the MS Coco Dataset.
- Used the pretrained **VGG 16** model for image feature extraction and stacked **LSTM layers** for text feature extraction.
- Experimented with combining the multimodal feature vectors using **concatenation** and **Hadamard product** approaches to obtain the combined feature vector for final answering.

Feedback-based Retrieval System with Sentence Ranking

Oct 2018 – Dec 2018

- Designed and implemented an efficient, configurable, and intelligent retrieval framework for text documents.
- Used NLP methods and concepts such as **stemming**, **tf-idf scores**, **BM25 scores** and **nlTK** for text processing.
- Implemented a **click-based feedback system** to improve suggestions to re-rank documents based on current retrieval.

TECHNICAL SKILLS

Programming – Python, C, Java, C++, SQL, Scala

Libraries and Frameworks – PyTorch, pytorch-geometric, Keras, scikit-learn, NLTK, networkx, Django, REST

ACHIEVEMENTS

- Awarded the **DAAD-WISE scholarship** to pursue summer research in Germany and the **mitacs Globalink** scholarship to pursue research in Canada.
- Awarded the **Institute Merit Scholarship** for being in the top 3 percentile of students across all the departments.
- Successfully completed **Google Summer of Code** 2018.
